

JAIME BEAT SYSTEMS

Price list

Package	Price	Included
1. DJ Deck Connection Call-Out	£125	A focused service visit for connecting or correcting a small home DJ setup. Suitable for a controller, mixer, decks or powered speakers that need tidy wiring and basic testing. • One DJ equipment connection • Basic cable tidy • Signal and playback check • Operating guidance
2. Home DJ Room Setup	£425	A compact installation for a dedicated home DJ room or practice space. We position the main equipment, connect the audio chain and check the system at practical listening levels. • Controller or turntable setup • Pair of powered speaker connections • Mixer and source wiring • Basic room layout advice
3. Mobile DJ Base Station	£950	A more complete setup for a mobile DJ who needs a reliable preparation and playback station. The package covers the main control surface, speakers and supporting connections in one room. • DJ controller or mixer installation • Main speaker and subwoofer connections • Microphone input setup • Cable labelling and testing
4. Small Venue DJ Booth	£2,250	A fixed DJ booth installation for a small bar, private venue or function room. We organise the booth connections and sound path so the operator can access the essential controls without loose cabling. • Fixed booth equipment layout • Mixer, deck and microphone wiring • Two main speaker connections • Playback and output testing
5. Bar Sound and DJ System	£3,250	A venue-focused installation for a bar or compact hospitality space requiring dedicated DJ playback and background music connections. The system is arranged around the serving area, booth and audience space. • DJ booth audio installation • Main speakers and subwoofer setup • Source selection and mixer connections • Cable routing around the venue

Package	Price	Included
6. Event Room Sound Package	£4,750	A larger sound installation for an event room, wedding venue or community hall. We connect the DJ position to a higher-output speaker system and prepare inputs for microphones and additional playback sources. • High-output main speaker system • DJ mixer and controller connections • Microphone and auxiliary inputs • Room-wide signal and level testing
7. Club DJ and Monitor Installation	£7,250	A substantial installation for a club or busy entertainment venue with a dedicated DJ booth, monitor speakers and audience-facing sound system. The layout is planned for clear control access and organised signal routing. • Club DJ booth installation • Booth monitor speaker setup • Main speakers and subwoofer integration • Structured cable routing and labelling
8. Multi-Zone Venue Audio System	£9,750	A multi-zone DJ and audio installation for a larger venue with separate areas such as a main room, lounge, bar or entrance. Each zone is connected and tested around its intended music source and volume control. • Multiple room audio zones • Central DJ and source connections • Independent zone controls • Full venue signal testing
9. Whole-Building Commercial DJ Installation	£13,500	A complete DJ audio installation for a large commercial venue, entertainment site or whole-building project. The scope can cover several rooms, permanent DJ positions, distributed speakers, control points and coordinated handover testing. • Whole-building audio layout • Multiple DJ and playback positions • Distributed speaker and subwoofer installation • Zone controls, labelling and system handover
